1st LIMAX WORKSHOP

29TH - 30TH SEPTEMBER 2017

Expert Meeting on Laser Applications in Thoracic Surgery

Department of Thoracic Surgery
University Hospitals of Leicester

University Hospitals of Leicester
NHS Trust

KLS martin
GROUP

INVITATION

Dear colleagues,

I cordially invite you to the first of what I hope will be a regular annual Expert Meeting.

Optimal treatment of our patients deserves optimal technical equipment. This is especially true in patients with lung metastasis. In more or less every one of these patients we encounter a different situation. This ranges from simple wedge resections to complex resections in cases of multiple metastases or metastases which are in the vicinity of the central vascular and bronchial structures of the lung. With the LIMAX Laser we now have an optimal instrument which allows us to dissect the lung parenchyma in a superior fashion.

Furthermore, the LIMAX Laser is also applicable for endotracheal and endobronchial problems, making it an interesting tool which is useful in many different clinical situations and applications.

The aim of our workshop is to demonstrate the usefulness of the laser technology for pulmonary diseases. On the first full day we will have an introduction into laser technology and the theoretical aspects of pulmonary metastasectomy. On the second (half) day all participants will have the opportunity to work in the wet-lab with the laser equipment.

We hope all participants will gain an interesting and fruitful insight into this state-of-the-art technique for the resection of pulmonary metastases and that there will be ample opportunity for discussions with colleagues from different NHS Trusts.

Apostolos Nakas
Scientific Director

PROGRAM

Friday 29th September 2017

Venue: Coombe Abbey Country House Hotel,
Brinklow Rd, Coventry, CV3 2AB

9.00	Registration
9.15	Welcome
9.30	Intro to Lasers & Light/Tissue Interactions
